J O Hambro Capital Management UK Dynamic Fund

Y Distributing GB00BDZRJ218

A sub-fund of J O Hambro Capital Management UK Umbrella Fund

Managed by JOHCM Funds (UK) Limited

Objectives and investment policy

- The investment objective is to achieve capital growth over a rolling seven to ten year period as well as providing income. In seeking to achieve its investment objective the fund will aim to deliver a return, net of fees, greater than that of the FTSE All-Share Index (12pm adjusted).
- The Fund will invest at least 90% in the shares of companies listed on either of the two primary markets of the London Stock Exchange: the Main Market (FTSE) and the Alternative Investment Market (AIM). At all times at least 75% is invested in the shares of companies that are domiciled, incorporated or have a significant portion of their business in the UK. At least 50% of the Fund will be invested in companies listed on the FTSE 100 index, which contains the 100 largest companies listed on the London Stock Exchange. The Fund also invests in smaller companies. The Fund may also invest in shares outside the UK, money market instruments, deposits, warrants and other collective investment schemes.
- The Fund is actively managed. The investment manager selects companies undergoing major transformation in their businesses as it is believed these changes will lead to an improvement in the performance

of these companies and their share prices. The Fund will typically invest in the shares of 35 to 50 different companies.

- The FTSE All-Share Index is a point of reference against which the performance of the Fund may be measured. While many of the Fund's investments may be components of the Index, its strategy allows for significant deviations. As a result, the Fund's performance can sometimes differ greatly from the Index.
- Portfolio transaction costs are paid out of the assets of the Fund in addition to the charges set out below, and may have an impact on the performance of the Fund.
- Any income the Fund generates for this share class will be paid out semi-annually.
- You can buy and sell shares in the Fund on any day which is a working day in London. Instructions received before 12:00 noon will be processed that day. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.
- Recommendation: The Fund may not be suitable for those investors who plan to withdraw their money within seven years.

Risk and reward profile

Lower risk			Higher risk		
Typically lower rewards			Typically higher rewards		
1	2	3	4	5	6

The calculated risk and reward category, as shown above, uses a method of calculation derived from regulatory rules. It is based on the rate at which the returns of the Fund have moved up and down in the past over the previous 5- year period (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1. Where less than 5 years of historical performance data is available, simulated performance will be used.

- Funds in category 6 have in the previous 5-year period shown relatively high volatility. With a fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high. Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- Investment risk** - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.
- Geographic concentration risk** - a fall in the UK market may have a significant impact on the value of the Fund because it primarily invests in this market.
- Company shares (i.e. equities) risk** - the value of Company shares and similar investments may go down as well as up in response to the performance of individual companies and can be affected by daily stock market movements and general market conditions.

- Concentration risk (number of investments)** - the Fund may at times hold a smaller number of investments, and therefore a fall in the value of a single investment may have a greater impact on the Fund's value than if it held a larger number of investments.
 - Smaller companies risk** - smaller companies generally carry greater liquidity risk than larger companies, meaning they may be harder to buy and sell, and they may also fluctuate in value to a greater extent.
 - Liquidity risk** - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the Fund's ability to meet redemption requests upon demand.
 - Currency risk** - the Fund can be exposed to different currencies and movements in foreign exchange rates can cause the value of investments to fall as well as rise.
 - Counterparty risk** - the insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
 - Regulatory risk** - any change in the Fund's tax status or in legislation could affect the value of investments held.
 - Capital erosion risk** - the Fund takes charges from the capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges.
- Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money. Consult your financial advisor or distributor for the actual amount they may charge.	
Charges taken from the fund over a year	
Ongoing charges	0.70%
Charges taken from the fund under certain conditions	
Performance fee	
A performance fee of 15% is payable on the excess if the NAV outperforms the Index Adjusted NAV (as defined in the Prospectus) on an annual basis. The calculation is performed daily. Any underperformance is carried forward.	
During the year ended 31 December 2024 the performance fee amounted to 0.30%.	

The charges you pay as an investor in the Fund are used to cover the operational costs of the Fund, including marketing and distribution costs. These charges reduce the potential growth of your investment.

The ongoing charges figure is based on the expenses of the Fund for the 12 month period ended December 2024.

This figure may vary from year to year and does not include Fund transaction costs.

For more information about charges see the Fund's prospectus, available at www.johcm.com.

Past performance

Past performance is not a reliable guide to future performance.

The past performance shown includes all charges except entry charges.

The Fund launched on 16 June 2008.

This class started to issue shares on 31 October 2013.

Past performance has been calculated in GBP.
