Dear (Salutation)

Change of Annual Management Charge (AMC) and fund objective

Account number: XXXXXX

Your financial adviser: XXXXXX

I am writing to you because you are invested in the FTF Martin Currie UK Managers' Focus fund, provided by Franklin Templeton Fund Management Limited.

What is changing

Franklin Templeton is decreasing the AMC for the fund from 28 June 2024. Fund managers apply an AMC for the investment management they provide. This is reflected in the pricing of the fund and not taken directly from your holdings.

The Ongoing Charges Figure (OCF) / Total Expense Ratio (TER) represents the ongoing charges for the fund, expressed as a percentage. It is the sum of the AMC and all other running costs of the fund. OCF is increasingly replacing the TER.

In addition, Franklin Templeton are also changing the investment objective of the fund from 28 June 2024.

The old and new objectives are overleaf for you to compare.

You may want to speak to your financial adviser about the impact of these changes. Please speak to them before making any investment decisions, or if you have any questions about these changes.

What this change means for you

	AMC %	OCF / TER %
Current	0.75	0.82
New	0.65	0.74

Please note that none of the changes detailed in this letter affect any charges made by Quilter.

- **The value of your holding** – The changes may affect the value of your fund holding. The portfolio of fund will need be realigned. The transaction costs of implementing the changes will be borne by the fund and are expected to be 0.23% of the fund value.
- **Risk profile** – The fund’s risk profile will not change.

Why the changes are happening

Franklin Templeton is simplifying the investment objective to give the fund’s investment manager more freedom to select investments in companies irrespective of size. This will help the fund to achieve its investment objective.
