FTF Templeton Global Emerging Markets Fund

Class W (acc) • ISIN GB00B7MZ0J00 • A sub-fund of Franklin Templeton Funds

The management company is Franklin Templeton Fund Management Limited which is referred to in this document as the authorised corporate director or "ACD".

Objectives and Investment Policy

FTF Templeton Global Emerging Markets Fund (the "Fund") aims to increase in value through investment growth by more than the MSCI Emerging Markets (Net Dividends) Index over periods of five years after all fees and costs are deducted.

There is no guarantee that the Fund will achieve this return over this or any other time period. Capital invested is at risk and you may get back less than you paid in.

Core investment

The Fund invests at least two thirds (but typically significantly more) in emerging markets (countries whose economy and financial markets are still developing). The Fund typically invests in shares of around 60–80 companies of any size or industry that:

- are listed on an emerging markets stock exchange, or
- are domiciled or conduct a significant proportion of their business in emerging markets, or
- receive a significant amount of their revenues from emerging markets.

To a lesser extent, the Fund may also invest in frontier markets, these are markets that are at earlier stages of their economic and financial market development than emerging markets.

Other investments

The Fund may also invest in:

- Other transferable securities including fixed interest and other debt related securities;
- Cash and cash equivalents;
- Money market instruments; and
- Other collective investment schemes (which may include collective investment schemes operated by the ACD or any of its associates). The Fund may not invest more than 10% in other collective investment schemes.

The Fund can use derivatives for efficient portfolio management (managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth). However, the Fund can introduce more speculative use of derivatives in the future on 60 days' notice to investors. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, interest rates, share prices or currencies).

Geographic locations (where we invest)

The Fund has a focus on investments in emerging markets. Up to one third of the Fund's portfolio could be invested outside of emerging markets.

How we select investments (investment strategy)

This Fund is actively managed, which means that the Investment Managers do not copy a benchmark when selecting investments for the Fund.

The Investment Managers use research and experience to identify companies that show more potential to deliver growth over the long-term (5 years) than their market price would suggest.

The Fund's portfolio may include some overlap with the Index but does not intend to replicate it and may vary considerably. The Fund may include shares and countries that are not included in the MSCI Emerging Markets (Net Dividends) Index.

Typically, to help manage risk, the Investment Managers aim to keep exposure to any single company in a range of 5% more or less than the Index and industry and country exposure in a range of 10% more or less than the MSCI Emerging Markets (Net Dividends) Index.

When selecting investments, the Investment Manager considers a range of factors, including ESG factors, which are used solely to identify opportunities or risks that may impact the financial value of the investment. No claim is made that the Fund has any sustainability-related objective or sustainability characteristics and no assurance is given that any investments will result in positive sustainability-related impacts or minimise negative impacts.

Additional Information

- You may request the sale of your shares in the Fund on any UK business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Terms to Understand

Shares of companies (equities): securities that represent an ownership stake in a company.

Collective investment schemes: other investment funds, like the Fund.

The income received from the Fund's investments is accumulated and included in the value of the shares.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in the equity and equity-related securities of emerging markets around the world that have historically been subject to significant price movements, frequently to a greater extent than equity markets globally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Foreign currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

Charges

One-off charges taken before or after you invest

Entry charge	Not applicable
Exit charge	Not applicable

This is the maximum that might be taken out of your money before it is invested (in the case of the entry charge) or before money is paid out to you when you sell shares in the Fund (in the case of the exit charge).

Charges taken from the Fund over a year

Ongoing charges	1.00%
------------------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
------------------------	----------------

The ongoing charges figure is based on the expenses for the Fund for the year to December 2024 and it may vary from year to year. It is an estimate of the charges made to the Fund over a year to cover the costs of managing, operating, and distributing the Fund. Charges are deducted from the value of the assets held by the Fund and are reflected in the daily price that is used to buy and sell shares in the Fund. These charges reduce the potential growth of your investment and/or the income paid from it. For example, a Fund with an ongoing charges figure of 0.5%, means that an investor would pay £5 in charges over the course of a year for every £1,000 they had invested. Please note that the ongoing charge excludes some other costs (such as those incurred by the Fund when buying and selling securities) so total costs paid by investors each year may be slightly higher than the ongoing charges figure.

For detailed information about charges, please refer to the “Fees and Charges” section of the current prospectus of Franklin Templeton Funds and the Fund’s annual report for details on the exact charges made.

Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP.
- The Fund was launched in 2004 and the present share class on 31/05/2012.
- We measure performance against the Fund’s performance target, the MSCI Emerging Markets (Net Dividends) Index, as it is widely available and reflects investments in stock markets of emerging markets countries.
